Satan Uses Medical Providers to Destroy Children

“Haven’t you read,” He [Jesus] replied, “that at the beginning the Creator ‘made them male and female,’ ” Matthew 19:4

Planned Parenthood is the largest abortion perpetrator in America, and now, Planned Parenthood (PP) is in the forefront of mutilating born children by offering hormone “therapy” and transition surgery referrals to teenagers. They have been promoting this path of destruction to teenagers through their YouTube video called “Is This Normal? Puberty in Intersex and Non-Binary People, Explained.” The video tells kids they can take hormone blockers “to match their gender identity,” and they falsely claim these hormone/puberty blockers are safe.

<https://bit.ly/3gCb2wA>

Puberty blockers are anything but safe. They disturb the hormonal process God created to turn boys into men and girls into women. Each hormone administered and each surgery performed is a hammer blow to the body of a teenage child made in God’s image. Puberty blockers are powerful, and they stunt growth and alter bone density. *The New York Post* reports: “Side effects of testosterone include high cholesterol, cardiovascular disease, diabetes, blood clots and even infertility.” The article further noted: “Serious surgeries like mastectomies are sometimes performed on children as young as 13.” <https://bit.ly/3SnIROV>

It is no coincidence that Planned Parenthood is deeply involved in this disturbing and evil practice. They have made hundreds of millions of dollars by killing preborn children, so why not further fill their coffers by luring vulnerable teenagers into harm through another type of deceit? Many of these vulnerable teenagers are autistic or mentally ill.

Many of the early victims of hormone blockers and surgery now deeply regret what they have done. There are many people who want to return to their God-given gender and they are called detransitioners. Medical interventions may have limited effect, but God can heal their hearts and minds.

Satan is using medical professionals and other trusted adults to prey on our children. It is significant to note that there are numerous commonalities between how these adults facilitate both abortion and gender transition surgery. They include:

1. Medical professionals lend credence to abortion and to trans surgeries/hormones .
2. Medical professionals use their skills to destroy people.
3. Medical professionals pressure the person to have the abortion or gender transition.

“You have to get the abortion by 16 weeks.” (This may only be the age limit for that abortion facility.)

“You will lose your psychological counseling.”

4. Medical professionals ignore red flags, such as the patient’s doubts and underlying mental and social issues.
5. Medical professionals do not educate the potential patient about what the surgery/ process will do to them physically or emotionally afterwards.
6. Medical professionals hide behind meaningless euphemisms to justify their actions.

DESTROY CHILDREN – Continued from page 1

Northland Family Planning tells women they are “good people” even if they abort.

The UK’s National Health Service statement reads that care plans for each person “are collaborative and tailored to each patient’s needs and goals, and treatment decisions are made following a thorough assessment in line with national recommendations.”

7. Medical professionals lie to the patient.
 “It’s not a baby. It is only a blob of tissue.”
 “You will feel better after your ‘gender-affirming’ surgery.”

Children’s hospitals around the country are shamelessly promoting child mutilation surgeries on their websites, including Boston Children’s Hospital, Los Angeles Children’s Hospital, Children’s Hospital of Philadelphia and Saint Louis Children’s Hospital. These hospitals need to be held accountable.

Vanderbilt Hospital recently came under fire for their child mutilation surgeries and apparently has temporarily halted doing them. *The Washington Examiner* highlighted the money machine churning at Vanderbilt University in Tennessee. The article reported that in 2018, Dr. Shane Taylor was caught saying on tape that “Vanderbilt’s ‘financial folks’ looked at how much each transgender patient could bring into the hospital and found that, just looking at ‘top surgery’ (not even including ‘bottom surgery’), each transgender patient would be extremely profitable.” <https://washex.am/3Ts2WoN> Another doctor, Ellen Clayton, warned of consequences for doctors who would not participate in these surgeries due to their religious beliefs.

JAMA Pediatrics published online an October 17, 2022, study which found a 400% increase from 2016 to 2019 of “chest reconstruction” surgeries on teenagers. These surgeries are euphemistically described as “masculinizing chest reconstruction (e.g., mastectomy) and feminizing chest reconstruction (e.g., augmentation mammoplasty),” but the butcher surgeons are actually performing mastectomies on healthy teenage breasts and disfiguring male chests into female breasts. <https://bit.ly/3z5jvyK>

On [Transhealthcare.org](https://www.transhealthcare.org), there are 41 pages of gender surgeons who openly admit to the public they are involved in gender mutilation surgeries: <https://www.transhealthcare.org/usa/> We are considering picketing their offices. We urge you to pray for these doctors, asking God to bring them to repentance.

CBR has designed and begun displaying signs that educate people about the trans travesty. We show how gender transitioning children is comparable to abortion. We expose Planned Parenthood as a big perpetrator of the evil. We are a voice for these children, and we pray that God uses our efforts to save more from destruction.

The Center for Bioethics and Culture has produced an enlightening video titled “Trans Mission: What’s the Rush to Reassign Gender?” <https://youtu.be/rUeqEoARKOA>

Matching Gift Program

Does your employer have a MATCHING GIFT PROGRAM? Your donation to CBR could be doubled if you inquire about this option and participate. Many companies have matching gift programs and they often match donations 1:1. CBR would be blessed if you decide to donate through your employer matching gift program.

We thank God for your support of our work.

“Everyone who does evil hates the light, and will not come into the light for fear that their deeds will be exposed. But whoever lives by the truth comes into the light, so that it may be seen plainly that what they have done has been done in the sight of God.”

JOHN 3:20–21

Prayer Requests

- Genocide Awareness Project on campuses
- Protection on our families
- For pastors to lead their flocks to stand for the sanctity of human life

Putting Pebbles in Students' Shoes in Arizona

More college students are returning to campuses, so our team was eager to take our Genocide Awareness Project (GAP) to three colleges in Arizona in October. The first stop was Arizona State University (ASU) in Tempe, Arizona, on October 3. ASU has 54,866 students enrolled on their main campus. Thus far, we have been unable to find student sponsors, so we walked onto campus with our signs and displayed them at the best location we could secure. We held six signs, including a 6 x 12-foot sign which compares abortion to genocide, as well as signs showing actual photographs of aborted babies.

CBR Director of Operations Kevin Olivier spoke with an ASU student who thought that the typical pro-life view is that abortions should never be allowed, even if the mother will die if the pregnancy continues. He was able to point out to him that every single one of the 18 states that have greatly prohibited abortions makes an exception for an abortion to save the life of the mother. That was clearly news to him and seemed to make him less hostile to the pro-life view.

The second university was Grand Canyon University in Phoenix on October 4. This was our first visit to this growing Christian campus of 25,000 students. Private schools are not under the same First Amendment requirement to permit us on campus, so we had to display our signs at their main entrances.

We received mostly encouragement from the students who saw our signs. Volunteer Mary Jane reported that a student who came out to protest us with a hand-made sign didn't seem to have a problem with abortion, but she had a problem with us showing the truth about abortion. She objected to how she believed CBR obtained the abortion. When Mary Jane asked her if she objected to pictures of the Holocaust, her answer was unclear. She did accept a CBR brochure, and we hope that the photos and information will help resolve her confused thinking.

The last campus visited on this tour was Glendale Community College (GCC) in Glendale, Arizona on October 5-6. This was our third time on this campus of 18,054 students.

Glendale Community College students stop to take in the message of our Genocide Awareness Project on October 5.

Volunteer Rene had many interactions with students which proved memorable. One in particular was with a student who began by asserting that abortion should be accessible to all. He was unable to define when life begins and if human rights apply to preborn humans. He focused on poverty and other circumstances he felt warranted abortion. Rene shared her experience teaching poor mothers in Eastern Africa how the baby develops in the womb, and said that while the women barely made a living as maize farmers, their children were what brought them joy. The student was moved to reveal that his family immigrated from Sudan where his mother had been a poor woman gathering maize. He had to leave for class, yet he returned with a new attitude to continue the discussion. He conceded the truth of the preborn as human and deserving of rights.

CBR-Southwest Director Abra Singleton's father John is a CBR volunteer. As a former atheist, he has a distinct message as he speaks with students. When a female student asked him, "So if we say abortion is murder, so what? What do you say to us then?" John guided the conversation to talk about God. A 20-year-old male student spoke with John, and said as he ended the conversation, "I have a feeling I'm going to have a pebble in my shoe for quite some time."

Dr. Olivier spoke with a Jewish GCC student who began the conversation by challenging our comparison of abortion with the Holocaust. As their discussion progressed, it became clear that it would be better to discuss religion than abortion with her. She doesn't embrace Judaism theologically and is searching spiritually. Dr. Olivier asked her whether she was willing to watch a movie on the evidence for Christianity and she said yes, so we gave her a copy of the movie "The Case for Christ." Thank God for these opportunities that arise at GAP.

“ *I have a feeling I’m going to have a pebble in my shoe for quite some time.* ”
