Mothers' and Babies' Lives Matter

The prenatal science exhibit has toured seven more universities in recent weeks. As we listen to and observe the responses from students, staff and faculty on these campuses, we are learning how to make our prenatal presentations even more effective. Even the placement of our large television screen makes a difference in catching their attention. The rare video footage of living human embryos and fetuses, alive and active in the womb, makes some people stop in their tracks to watch.

In this issue, we are featuring photos and remarks we have received at several of the universities we toured. The first university visit was to Georgia Institute of Technology in Atlanta, Georgia on September 15-16.

September 15-16
Georgia Institute of Technology in Atlanta, Georgia

"Thank you for coming out here." Male student

A young woman walked past silently with her hand on her heart and a serious expression on her face.

"This is overwhelming, so complex and hard to ignore." Male student

September 17-18
University of North Georgia in Gainesville, Georgia

"What simple things can the mom do? How will these things help the baby? I see that early education is important. I am into kinesiology and am really interested in this." Male student

"Thank you for doing this." A young woman said this and fist bumped three of our staff.

"Oh, this is so important." Two young ladies

"This is amazing." Spoken by a Chick-fil-A employee who was taking photos of our display.

September 22-23
University of Georgia in Atlanta, Georgia

"Cool project… We love the message of healthier moms and babies." Two male Christian students

"My mom worked 25 years in labor and delivery. She saw so many fetal alcohol preemies. So sad. This is a good thing." Male student

September 24-25
Augusta University, Health Sciences Campus
in Augusta, Georgia

"They are getting reproductive organs already?" Female student

"Look, that could be inside you!" A female student to another female

"Look how big they're getting! Female student

"I am glad you are educational. We need this. Do you offer any resources?" "How has this been received?" Questions from two university staff members

Two freshmen women understood the display and said it is very necessary, especially in the black community. They scanned some of the QR codes.

"Wow. I didn't know so much had happened by 10 weeks. Looks like the rest of the time the baby is just chilling!" Three freshmen women talking together

Whatever Happened to Sin? CBR Proclaims Truth Which Much of the Church Fails To Do

George Barna, a respected pollster, and Director of Research for the Cultural Research Center, recently stated: "The job of the local church is to educate people about God's ways… Yet, a 2019 Pew Research study that analyzed sermon content across the nation determined that just 3% of all sermons preached even mentioned sin. That's a devastating body blow to the Church world." Read: http://bit.ly/4nsPnUg

If pastors aren't preaching about sin – what is right and wrong in God's eyes – then people in their churches are confused about how they should live to please God. This ignorance leads many in the Church to commit sins like abortion. CBR projects which expose the sin of abortion include our abortion photo trucks and the Genocide Awareness Project, and they can propel people in our culture to choose life and not abortion. Both Christians and non-Christians need our clear message. Christian singer Steve Taylor wrote a song in 1983 titled "Whatever happened to sin?" His lyrics include this powerful line: "Whatever happened to sin? When the closets are empty and the clinics are full…whatever happened to sin?"

If pastors won't teach the truth to their congregations, we will do their job for them. Thank God for faithful pastors who do boldly proclaim God's Word.

Thank God for Pastors Who Support Our Ministry

The following feedback is from a pastor regarding our Psalm 139 Prenatal Science display which we took to his Catholic Church in Phoenix on May 18, 2025:

"The display is a powerful illustration of the seamless continuity in human fetal development. What is shown at each week of gestation is clearly the same organism as what was present the week before, exposing the absurdity of the argument that what begins as a lump of cells just magically becomes human at some later stage of development. What is present at 9 months is substantially identical to what was present at 9 weeks, and even 9 days."

God bless you,

Fr. David McWhirter, FSSP
Associate Pastor, Mater Misericordiæ
& St. Edward the Confessor

We are grateful for your support which enables us to bring the truth to our culture.

"By lovingkindness and truth iniquity is atoned for,
And by the fear of the Lord one keeps away from evil."
Proverbs 16:6

Prayer Requests

- Safety and effectiveness as we educate on college campuses
- Pastors and priests to preach against abortion
- God's provision for CBR and all our ministries

Events

Psalm 139 Exhibits at Churches

Oct. 5	Calvary Chapel, Knoxville, TN
Nov. 2	Grace Lutheran, Knoxville, TN

Urban Prenatal Science Exhibits

Oct 17	Knoxville Market Square, TN

Campus Prenatal Science Exhibits

Oct. 20	Appalachian State University, Boone, NC
Oct. 22-23	East Carolina University, Greenville, NC
Oct. 27-28	East Tennessee State University Johnson City, TN
Oct. 29-30	Western Carolina State University Cullowhee, NC

Sign Displays at Abortion Mills

Weekly at Planned Parenthood, Honolulu, Hawaii

Oct. 18	Planned Parenthood, Mission Viejo, CA

Want to schedule the Prenatal Science Display AT YOUR SCHOOL OR CHURCH? Contact CBR for more information: cbr@cbrinfo.org
